Crops : All Vegetable and Fruit Crops,
All flowering Plants.

Features: 100% Water Soluble NPK Fertilizer, neutral salt and has no effect on soil acidity or alkalinity. Free flowing Material. This Fertilizer contains Potassium (50%) and Sulphur (17.5%). Both these nutrients are essentials for Plant yield.

00:60:20 Potassium Magnesium Sulphate

Dosage : 5gms per liter of water.1kg per acre in 200 liters of water.

Crops : All Vegetable and Fruit Crops, All flowering Plants.

Features: 100% Water Soluble NPK Fertilizer, neutral salt and has no effect on soil acidity or alkalinity. Free flowing material. This fertilizer contains Nitrogen (0%), Phosphorus (60%), and Potassium (20%). It promotes strong root growth, early flowering, better fruit development, and overall plant vigor.

00:30:34 Potassium Phosphate

Dosage : 5gms per liter of water.1kg per acre in 200 liters of water.

Crops : All Vegetable and Fruit Crops, All flowering Plants.

Features: 100% Water Soluble NPK Fertilizer, neutral salt and has no effect on soil acidity or alkalinity. Free flowing material. This fertilizer contains Nitrogen (0%), Phosphorus (30%), and Potassium (34%). These nutrients play a vital role in root development, flowering, fruit setting, and yield improvement.

NPK 12:32:16 Water Soluble Fertilizers

Dosage : 5gms per liter of water.1kg per acre in 200 liters of water.

Crops : All Vegetable and Fruit Crops, All Cereals, Pulses, and Flowering Plants.

Features: High-quality balanced NPK complex fertilizer containing Nitrogen (12%), Phosphorus (32%), and Potassium (16%). Ensures uniform growth, better root development, strong flowering, and improved fruit/seed setting. Free flowing and chloride -free, suitable for all soils and crops.

MAP 12:61:00 Water Soluble Fertilizers

Dosage : For Foliar Spray Vegetables - 60-70 gm per 15 liter of water pulses - 50-75 gm per 15 liter water

Crops : All types of Plants and Garden.

Features: fertilizer

NPK 15:15:15 Water Soluble Fertilizers

Dosage : 5gms per liter of water.1kg per acre in 200 liters of water.

Crops : All Vegetable and Fruit Crops, Cereals, Pulses, Oilseeds, and Flowering Plants.

Features: Balanced NPK fertilizer with equal proportion of Nitrogen (15%), Phosphorus (15%), and Potassium (15%). Promotes vigorous plant growth, enhances flowering and fruiting, and improves overall crop productivity. Ideal for basal as well as foliar application.

13:00:45 Potassium Nitrate

Dosage : Foliar spray: 1 kg Katayani NPK 13:0:45 to be dissolved in 200 L water & spray for one Acre land repeat minimum twice in 10 - 12 days interval.

Features : • 100 % water soluble formula with balanced pH which helps feeding all types of crops.
• It increases the crop's nutrition value as well as shelf life. The produce can be stored and transported without any damage.
• It makes plants more resistant to adverse climatic conditions as well as attack of pests and diseases.
• It increases weight, colour, size and shelf life of fruits and vegetables.

17:44:00 Ammonium Polyphosphate

Dosage : 5gms per liter of water.1kg per acre in 200 liters of water.

Crops : All Vegetable and Fruit Crops, Cereals, Pulses, Oilseeds, and Flowering Plants.

Features: Highly concentrated phosphorus (44%) and nitrogen (17%) source. Improves root establishment, enhances flowering, increases fruit set, and boosts yield quality. Provides uniform nutrient availability and is suitable for drip irrigation and foliar spray.

NPK 13:40:13 Water Soluble Fertilizers

Dosage : Mix 4-5 grams of NPK (13:40:13) in 1 liter of water for foliar spray.

Usage : Healthy Vegetative Growth, Flowering and Fruiting Support, Improves fruit quality, size, weight, color, and shelf life.

Features: benefits different growth stages of crops. It's a versatile option for all types of crops.

NPK 18:18:18 Water Soluble Fertilizers

Dosage : 5gms per liter of water.1kg per acre in 200 liters of water.

Crops : All Vegetable and Fruit Crops, Cereals, Pulses, Oilseeds, Cotton, Sugarcane, and Flowers.

Features: Balanced source of Nitrogen (18%), Phosphorus (18%), and Potassium (18%). Promotes vigorous growth, improves flowering, increases fruit size, enhances -yield quality, and boosts crop resistance to stress.

DAP 18:46:00

Water Soluble Fertilizers

Dosage : 4–5gms per liter of water.1kg per acre in 200 liters of water.

Crops : Paddy, Wheat, Maize, Pulses, Oilseeds, Cotton, Vegetables, Fruits, Sugarcane.

Features: High Phosphorus (46%) content ensures strong root development, early crop establishment, better flowering, improved grain filling, enhanced yield, and increased disease resistance.

28:28:00

Ammonium Phosphate Sulphate

Dosage : 4–5gms per liter of water.1–1.5kg per acre in 200 liters of water.

Crops : Paddy, Wheat, Maize, Pulses, Cotton, Sugarcane, Fruits, Vegetables, Oilseeds.

Features: Balanced Nitrogen, Phosphorus, Potassium ensures vigorous vegetative growth, strong roots, better flowering, higher fruit setting, improved grain filling, and enhanced overall yield.

NPK 19:19:19

Water Soluble Fertilizers

Dosage : 2 gram per Litre of water.

Features : Responsible for the growth of leaves. Overall function of the plant performs correctly. Vegetative growth in early stages of plant. Nutrients are textured and cohesively balanced.

Usage : Enhance uptake of nutrients, improves bearing of flowers and fruits.

Ferrous Sulphate 12%

EDTA Chelated

Dosage : 2–3 gms per liter of water as foliar spray.500 gms–1 kg per acre through drip irrigation

Crops : Paddy, Wheat, Maize, Cotton, Sugarcane, Pulses, Fruits, Vegetables, Oilseeds.

Features: Provides 100% water-soluble chelated Ferrous (Fe).Corrects iron deficiency quickly and prevents chlorosis (yellowing leaves).Promotes healthy chlorophyll formation and greener leaves.Improves photosynthesis, flowering, and fruit setting.Helps in better vegetative growth and higher yield.Compatible with most fertilizers and pesticides.

NPK 20:20:20

Water Soluble Fertilizers

Dosage : 2 Gram Npk in 1 Litre water

Usage : For home garden and Nursery and also for agricultural purposes.

Features: Provides complete plant food for all stages of development. Increase yield 20-40 percent depending upon the type of crop. Enhances the product capacity of the crop. It is suitable for fruit development.

Boron (B) 20%

Water Soluble Fertilizers

Dosage : 1 to 1.5 grams per liter of water.

Drip irrigation : 2.5 to 5 kg per hectare

Features : Improves the flowering and fruit. Suitable for soil application. Direct by mixing in water.

Calcium Nitrate

Water Soluble Fertilizers

Composition : Calcium 18.8 % and nitrogen 15.5 %

Dosage : Dissolve 4.0 – 5.0 g of Calcium Nitrate per litre of water

Features: Increase the shelf life of fruits, root development, efficient nutrient uptake

Manganese Sulphate

Water Soluble Fertilizers

Dosage : 0.5–1gm per liter of water as foliar spray. 5–8kg per acre through soil application.

Crops : Paddy, Wheat, Soybean, Cotton, Citrus, Grapes, Banana, Tomato, Potato, Pulses.

Features: Corrects Manganese deficiency, prevents leaf yellowing, supports chlorophyll formation, improves enzyme activity, enhances root development, and boosts yield quality.

Copper Sulphate

Water Soluble Fertilizers

Dosage : 300 to 400 GM Acre

Crops : All Crops.

Features: Corrects Copper deficiency, improves enzyme activity, enhances chlorophyll synthesis, strengthens disease resistance, promotes tillering and reproductive growth, and improves crop quality.

Megnesium Sulphate

Water Soluble Fertilizers

Dosage : 2–5gm per liter of water as foliar spray. 10–15kg per acre through soil application.

Crops : Cotton, Sugarcane, Grapes, Banana, Citrus, Paddy, Wheat, Tomato, Potato, Pulses.

Features: Corrects Magnesium deficiency, enhances chlorophyll formation, prevents leaf yellowing, improves photosynthesis, promotes sugar translocation, strengthens crop growth, and increases yield quality.

Ferrous Sulphate FESO4

Water Soluble Fertilizers

Dosage : Dissolve 2.5g of ferrous Sulphate in one litre of water and spray liberally on both surfaces of leaves.

Crops : All Crop

Features: Provides complete plant food for all stages of development. Increase yield 20-40 percent depending upon the type of crop. Enhances the product capacity of the crop. It is suitable for fruit development.

Zinc Sulphate

Water Soluble Fertilizers

Dosage : Dissolve 3-5 gms in one litre of water

Features: Regulates soil pH levels, Promotes early green coloration in leaves and increased fruit yields, optimal growth and the production of quality crops, fruits, and vegetables.
